

Dear FCC,

I am righting this statement to state my opinion on the NAB's petition to ban or limited XM radio to what they can provide to their customers. I am a customer of XM radio and I enjoy the service that XM has provided me. I choose to listen to XM radio rather your ordinary radio FM radio station because of the quality and variety. Nowhere can I have at the push of a button just about any type of music that I am in the mood to listen to with clear reception. Other FM radio stations need to improve their broadcasts if they feel threaten by the services that XM provides. Its just like any other business either you try to keep up with the competition or get out of the way. It is a violation of their 1st amendment right to limit what they are abale to broadcast. What makes them have any less right than any other local FM radio station. So I feel that this petition 04-160 by the NAB is ridiculous. How would they like to have someone petition against them and tell that they can not broadcast local weather and traffic. Any a paying customer I support XM radio 100% and I only hope that their abilities to provide the programming that I demand and deserve is only expanded not limited.
